

FORGED WEDGES

New Wedge Series from Miura Golf

M MIURA

WHAT YOU SEE, FEEL, AND HEAR BRINGS CLARITY TO EACH SHOT

Miura introduces their new, perfectly engineered wedges which are five years in the making. Melding the best of forged feel with two unique sole grinds which will benefit all golfers in all turf conditions. Showing a clean, classic forged wedge look, the Forged Wedge Series embody the three most important senses for a golfer. What you see, feel, and hear brings clarity to each shot for the part of the game where strokes are saved, and matches are won.

THE FORGED WEDGE BENEFIT

A majority of wedges on the market today are cast and these new Miura wedges are forged. Not only are they forged, but they are also forged the Miura way which is vastly superior to any other forged wedge on the market. The use of soft carbon steel is where the feel comes into play. Often described as buttery or soft, what we are really describing is solid. And solid means consistency.

Every wedge is stamped with the forged “Kanji” symbol, a Japanese character which translates to “striving” or “noble effort.” Hit them once, and you’ll understand immediately.

THE Y GRIND

- Beneficial for neutral to steep attack angles.
- This grind has a leading edge grind to make turf interaction seamless when paired with Miura irons.
- Pairing the leading edge, high bounce and cambering makes it a “cheat code” out of bunkers, soft conditions and long rough.

FINISH: Chrome

DEXTERITY: Right-Handed

| | | | | | | |
|-------------------|-----|-----|-----|-----|-----|-----|
| LOFT° | 46° | 48° | 50° | 52° | 54° | 56° |
| LIE° | 64° | 64° | 64° | 64° | 64° | 64° |
| FP* (mm) | 5.5 | 5.5 | 5.5 | 6 | 6.5 | 6.5 |
| BOUNCE | 10 | 10 | 12 | 12 | 12 | 14 |
| WEIGHT (g) | 296 | 296 | 296 | 298 | 300 | 300 |

*FP= Face Progression

THE C GRIND

- Features great versatility benefiting the player with a neutral to shallow attack angle.
- The grind appeals to the player who wants to play open face shots around the green utilizing the heel and trail edge grinds.
- Pairing the trail edge and heel grind with low bounce instills confidence for the player out of firm ground conditions and tight lies.

FINISH: Chrome

DEXTERITY: Right-Handed

| | | | | |
|-------------------|-----|-----|-----|-----|
| LOFT° | 54° | 56° | 58° | 60° |

SHAPE AND HEAD WEIGHT

Multiple steps gradually define the shape and achieve the precision for which Miura is renowned. The ability to deliver a club head which achieves a +/- tolerance of .5 grams means the integrity of that wedge head is maintained. The weight and density of the head is optimally distributed which, when assembled with grip and shaft.

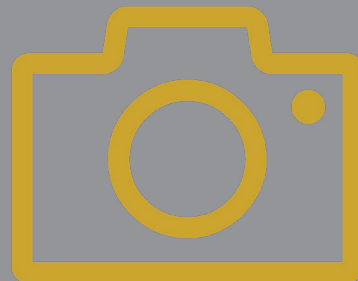

Showing a clean, classic forged wedge look, our wedges have already helped thousands develop the confidence to convert their games to forged excellence. The new Y and C grind soles, ground to shapes preferred by pros, interact crisply with the turf to enhance contact and encourage consistency. The lie, loft and FP specifications ensure a flawless flow from hosel to clubhead.
